I. Introduction & Background

The following information is a summary report of the academic integrity cases received during the 2023 - 2024 academic year. While every effort has been made to ensure the accuracy and completeness of this data, it is important to note that there may be some errors or inconsistencies. These could arise from various factors such as data entry errors, reporting discrepancies, or updates to case statuses after the data was compiled. We recommend interpreting the findings with these potential limitations in mind. We are continually working to improve our data collection and reporting processes to provide the most accurate and up-to-date information possible. For additional information on data collection and categorization see the Glossary on the AIO website.

II. Sanctioning Guidelines

The Administrative Sanctioning Guidelines aim to establish a structured, consistent, and transparent approach to decision-making, emphasizing desired behaviors and allowing for professional judgment. Disciplinary actions are based on a point value system derived from objective criteria. The focus is to provide an objective baseline for disciplinary actions and counsel students on the importance of academic integrity and the escalating severity of violations throughout their academic and professional progression.

III. Resolution Meetings & Outcomes of Academic Integrity Allegations

Except in the event of an Instructor-Student Resolution, once a student has been reported to the AIO, the case is assigned to a Resolution Appropriate Administrative Authority (Resolution AAA) who notifies the student to schedule a Resolution Meeting. At this meeting, there are three (3) possible outcomes:

1. the student accepts responsibility or fails to schedule their meeting and is assumed to have accepted responsibility;
2. the student does not accept responsibility but the evidence is sufficient, so the case proceeds to the Academic Integrity Review process. In this situation, it will be the AI Review Panel who will make a decision of the case, either holding the student responsible for an academic integrity violation or not;
3. the student does not accept responsibility and presents some relevant evidence that the Resolution AAA shares with the Instructor who subsequently withdraws the allegation.

IV. Appeals

During the AI process, students may be eligible for three types of appeals: (1) AI Review Board Decision; (2) Administrative Sanction (if suspension or dismissal is assigned); (3) Failure to Respond. Students must meet specific criteria to be eligible for each appeal type and only one appeal may be submitted per type. Once a decision has been made, the outcome is final. Learn more about appeals on the AIO website.
