EFG ELEKTRİK  
Company Profile

# Who Are We?

**EFG Elektrik**  
Directs to Energy

EFG Elektrik is a company established in Diyarbakır in 2015 with entirely domestic capital. Combining years of experience and expertise with a skilled and knowledgeable team, it has proven itself in the industry.

# Production Based on Expertise and Experience

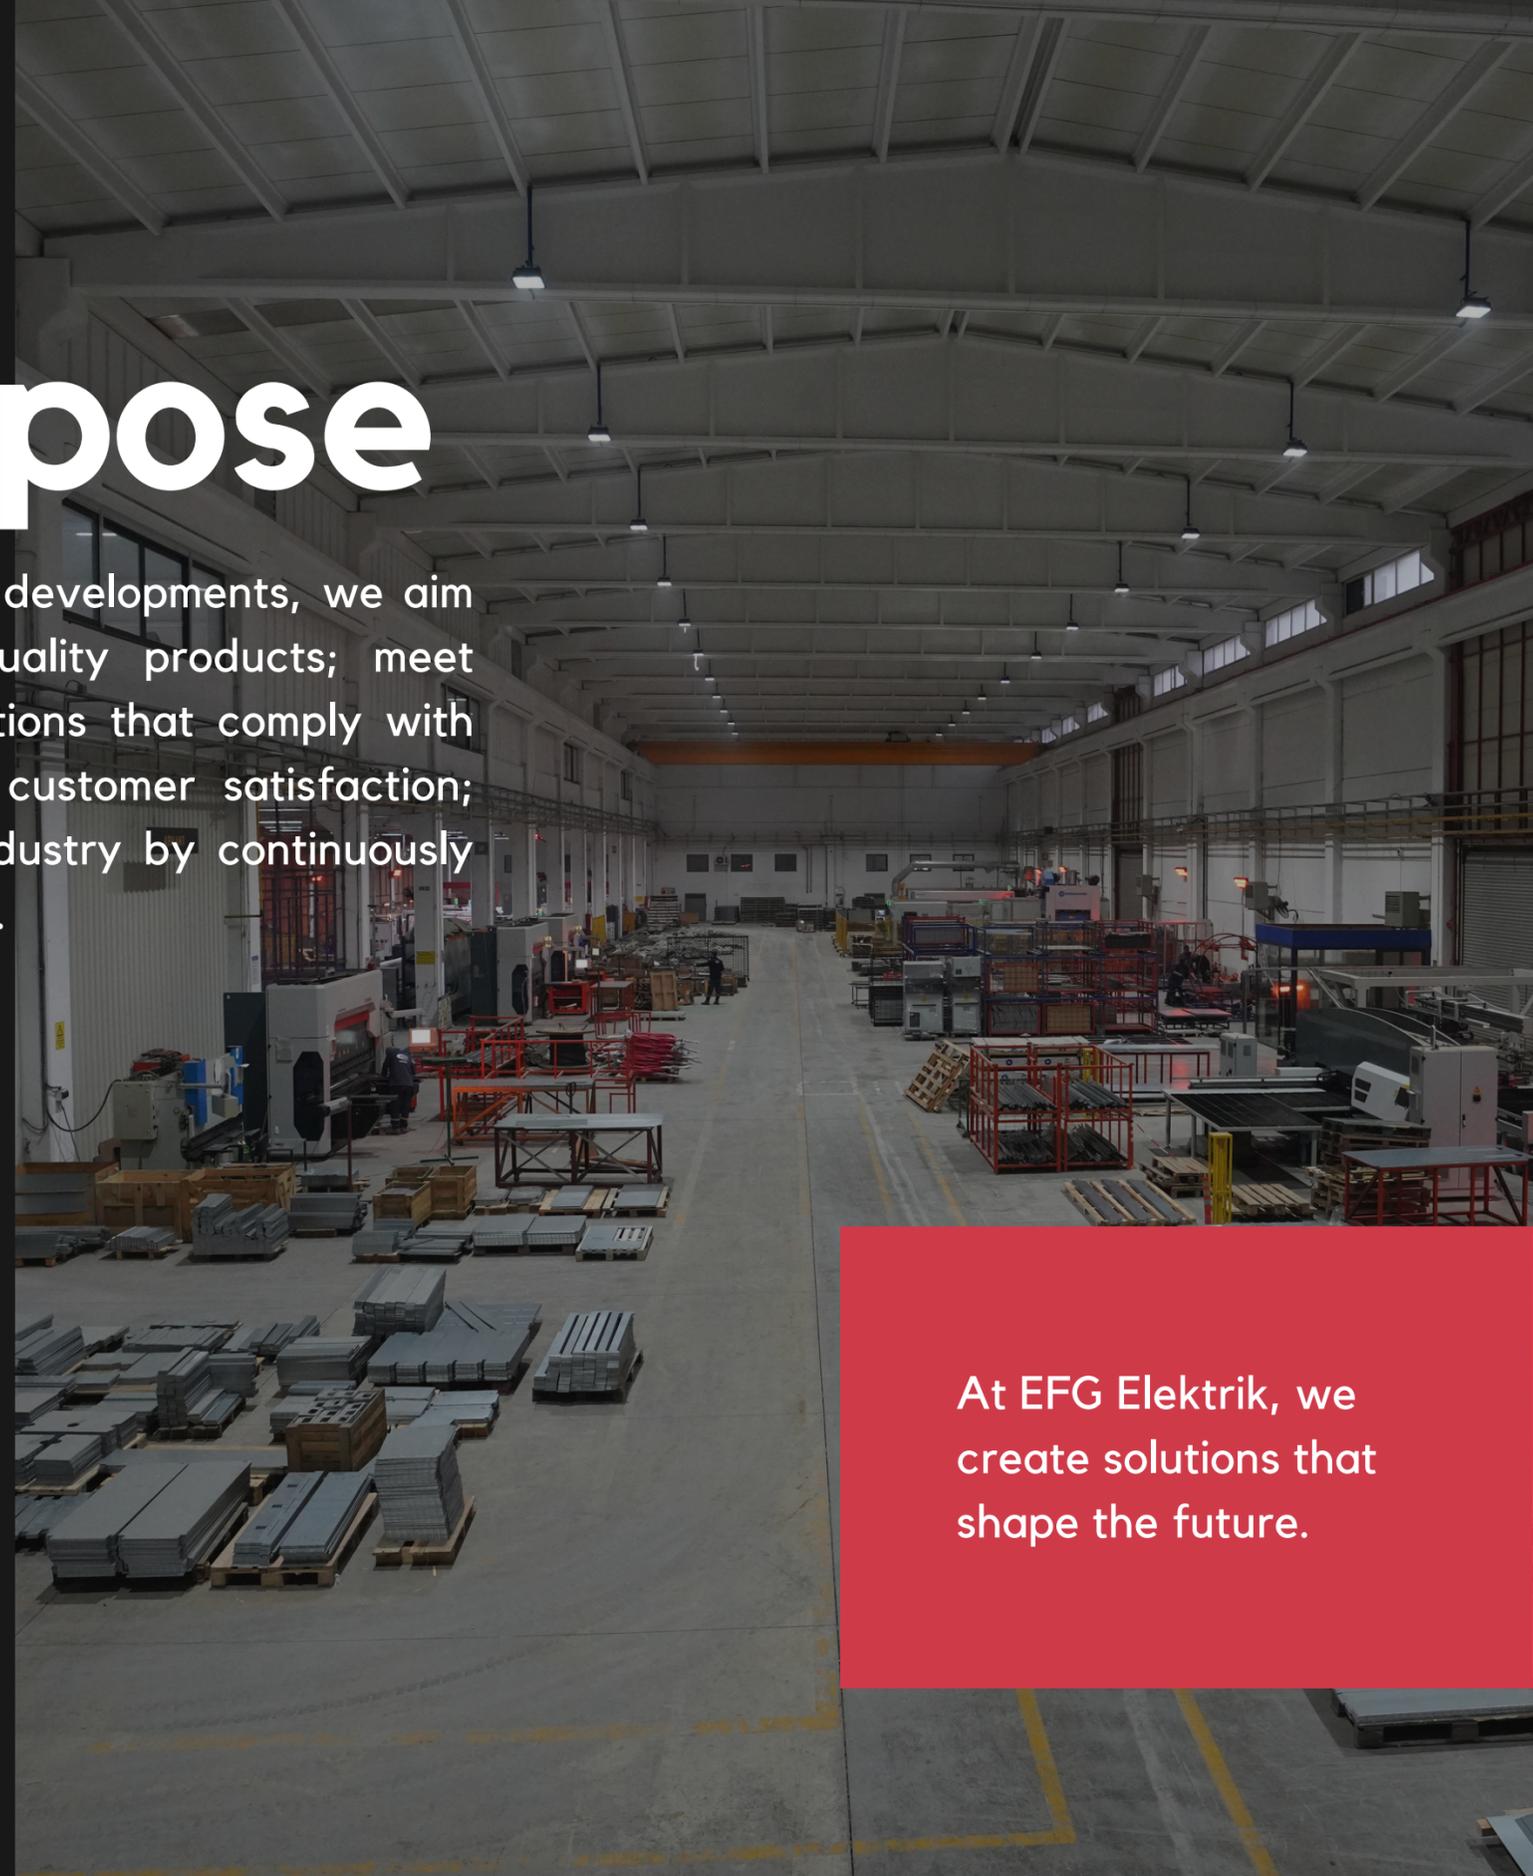

As a company that has proven its quality through reliable and high-standard products tested in accredited local and international laboratories, we serve the electromechanical industry with metal-enclosed modular cells, monoblock concrete substations, prefabricated centers, metal sheet substations, and custom manufacturing. With 21,000 square meters of closed space and 9,000 square meters of open area, we are the largest and highest-capacity production facility in the region's industry.

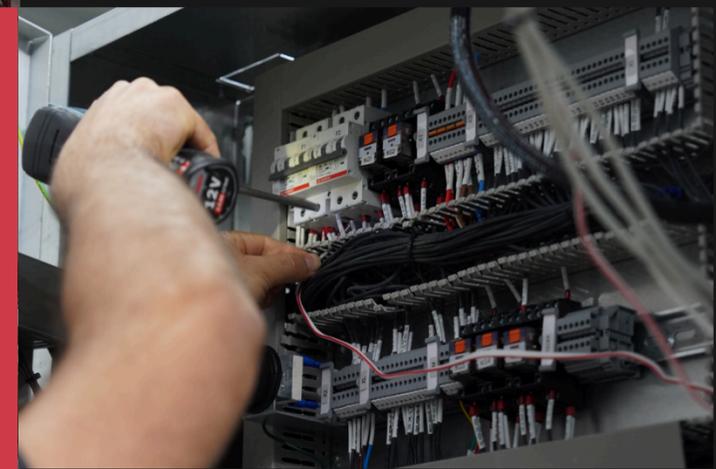

# Our Purpose

By closely following technological developments, we aim to produce and improve high-quality products; meet customer expectations; offer solutions that comply with international standards; enhance customer satisfaction; and create a difference in the industry by continuously expanding our production capacity.

At EFG Elektrik, we create solutions that shape the future.

# EFG's Vission

## Leading the Way in Energy!

To become a globally recognized and industry-leading brand by adopting the technologies of the future and embracing an innovative production approach in the energy sector.

**Stronger Together**

**Connect with Confidence**

**Shape the Future**

# EFG's Mission

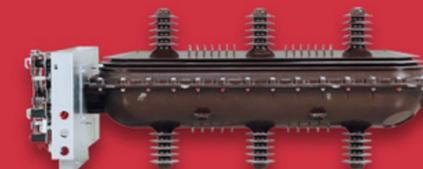

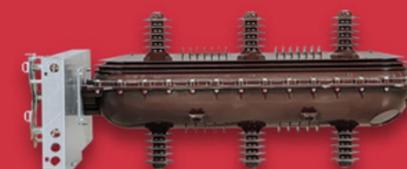

To deliver added value to our country and the industry by ensuring maximum customer satisfaction through superior quality, innovative R&D efforts, and a continuous improvement approach in the production of Medium Voltage Switching Products and Compact Transformer Centers.

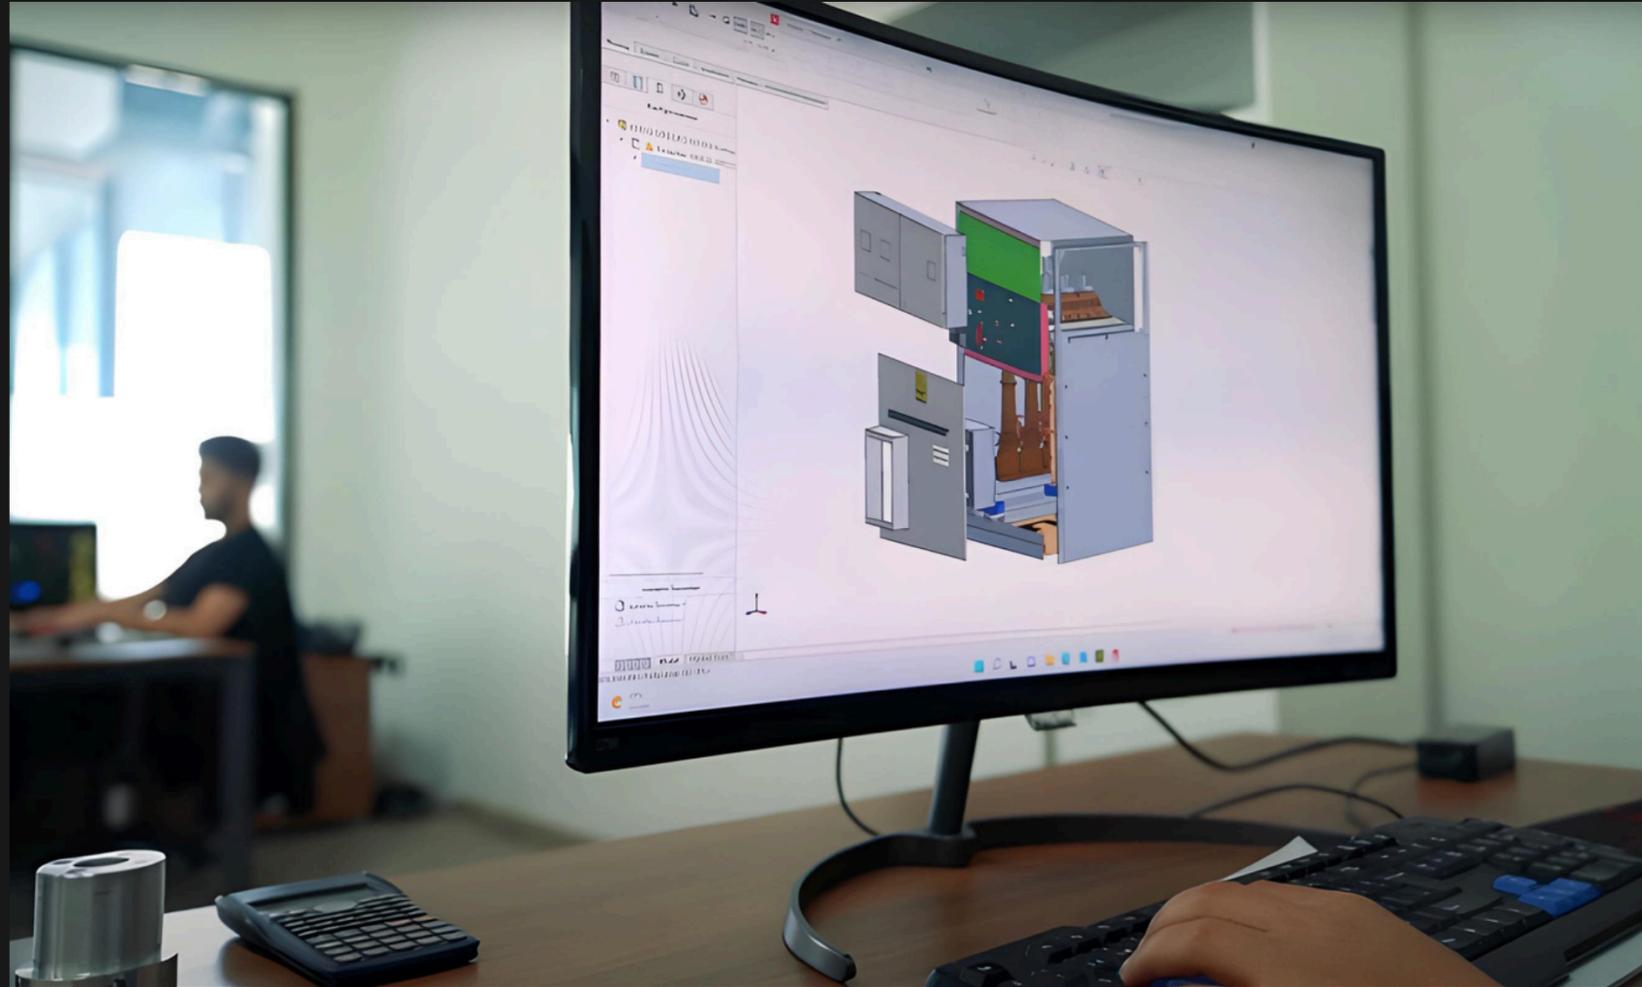

# Our Products

- Concrete Kiosk
- Medium Voltage Switchgears
- SF6 Gas Circuit Breakers
- Vacuum Circuit Breakers
- SF6 Gas Disconnectors
- SF6 Gas Load Break Switches

# R&D

Our company, which began its R&D activities in 2018, continues its research and development efforts. We have initiated the necessary steps to become an R&D center. Accordingly, EFG Elektrik operates under the strategy of "Growth Centered on R&D."

Our company's efforts to obtain an R&D Center certificate are nearing completion, and it is planned that R&D activities will be carried out within this center.
