ISLPED 2024 Camera-Ready Paper Submission

Submission deadline: June 17, 2024

All accepted papers require the explicit submission of a final (camera-ready) version of the manuscript, even if you do not intend to make any changes to your original submission. You must also complete the ACM Copyright form and add ACM Computing Classification categories and terms to your paper. Author-identifying information, such as author names, affiliations, acknowledgements, and references should be included.

To complete this process, please read carefully and follow the instructions below:

1. Prepare Final Manuscript

Manuscripts should not be significantly modified from reviewed versions unless instructed by the Technical Program Committee.

Step 1. Use the ACM Template

The ISLPED proceedings use the ACM template this year. Papers that use the IEEE template will be returned to the author for correction. Please use the ACM "sigconf" proceedings template. You can download the LaTeX template (strongly recommended) and Microsoft Word template from the ACM website. Do not modify the template, such as the font size, margins, and line spacing. Papers that do not adhere to the template may be returned to the author for correction.

All accepted papers (regular papers and posters) should be full-length of up to 6 pages, including references.

Step 2. Insert Copyright Information

ACM has an automated rights management form collection system for ACM published proceedings. The contact (lead) author(s) will be sent the ACM rights management form and complete instructions on how to complete their form.

After completing the rights management form, authors will be emailed the correct rights text and bibliographic strip to place within their paper. Authors must enter the text into their paper.

As rights management emails are sent from an automated system, there is a chance that emails sent will wind up in SPAM folders. Please make sure that you set email SPAM settings to allow emails from rightsreview@acm.org.

Step 3. Insert ACM Computing Classification System (CCS) Categories

The authors should apply ACM Computing Classification categories and terms. The templates provide space for this indexing. The Computing Classification Scheme can be found on the ACM website. If there are troubles finding appropriate categories and subject descriptors, contact Craig Rodkin <rodkin@hq.acm.org> for suggestions.

Step 4. Insert Keywords

The authors should add appropriate keywords. The templates provide space for keywords.

Support

ACM support for preparing camera-ready PDF ACM offers 24/7 author support for these templates through our vendor, Aptara. For any problems and inquires related to TeX/MS-Word template, please email <acmtexsupport@aptaracorp.com>.

4. Submit the Final Paper

Alongside the camera-ready PDF's, authors are required to collect and submit the source files for each paper – all files which were used to create the final output (PDF), be they Microsoft Word, LaTeX, image files, etc. If there are Supplements and Auxiliary Materials, they should be provided in separate zips and labeled as such - aux.zip or suppl.zip.

Submission of source files was always a requirement, albeit one that was hardly enforced in the past. In anticipation of serving both accessibility compliant PDF and responsive HTML5 formatted files from the ACM Digital Library, ACM is now enforcing this requirement.

Submit your final paper PDF (and the source code as ZIP file) through the SOFTCONF system. Please check that the copyright notice in your PDF (only first page) matches the copyright specified in the copyright form (based on author affiliations).

5. Register for the Conference

Each paper requires one full registration at the conference in order to be published. You must register before the early registration deadline. The registration website will be available soon.

6. Present Your Paper

Presentation of the accepted papers/posters at the conference is mandatory. Papers that are not presented will be excluded from publication.

Question?

If you have any questions about camera-ready paper preparation, please contact the ISLPED 2024 Publications Chair (Younghyun Kim <younghyun@purdue.edu>). Please include "ISLPED camera-ready question" in subject line for quick response.
