

RJY GROUP

Delivering service and integrity

Who Are We?

RJY Group is a Service-Disabled Veteran-Owned Small Business (SDVOSB) that delivers specialized solutions to protect, maintain, and optimize the critical infrastructure systems that power essential facilities. We bring decades of experience in building automation, HVAC, chiller and maintenance, generator readiness, and smart building technologies.

Our team combines deep mechanical expertise with a modern understanding of (OT) Operational Technology/(ICS) Industrial Controls Systems. We ensure that vital systems—like HVAC controls, building automation, and emergency power—are not only running efficiently but are secure from Cyber Threats that could disrupt operations. Whether we're supporting a major hospital campus, a federal facility, or a complex commercial property, RJY Group is committed to resilience, reliability, and performance.

We take pride in being a mission-ready partner, offering scalable support, responsive service, and high-level technical capability across every engagement.

You Can Rely On us for:

- Building Automation System Services (Installation, Integration, Cybersecure Upgrades)
- HVAC System Repairs, Replacements & Preventative Maintenance
- Chiller Preventative Maintenance, Repair & Water Treatment
- Generator Testing, Load Bank Services, & Emergency Power Reliability
- Smart Building Technology Integration
- Cybersecurity for BAS and Critical ICS/OT Systems
- Cooling Tower Cleaning, Disinfection & Maintenance
- Predictive and Preventive Maintenance Programs
- Asset Management for Building Systems & Infrastructure
- Emergency Service Response for System Failures
- Support Staffing for HVAC, Chiller & BAS Technicians

Operation, Maintenance, and Repair Services

RJY Group provides a full spectrum of high-performance mechanical and infrastructure maintenance services—designed to protect the systems that keep your facility operational, safe, and resilient. Our Operation, Maintenance, and Repair Services go beyond reactive fixes. We offer strategic, data-informed solutions that prevent failures, extend system life, and enhance operational efficiency.

- **Preventative Maintenance**

Regular inspections and service routines that ensure optimal performance of HVAC systems, chillers, and generators—reducing costly downtime and unexpected outages.

- **Predictive Maintenance**

Advanced diagnostics and monitoring to detect system issues before they escalate. We use condition-based data to inform your maintenance strategy and avoid unplanned disruptions.

- **Emergency Service**

Fast and efficient 24/7 response to HVAC, chiller, or generator failures. We get your systems back online with minimal interruption.

- **Generator Load Bank Testing and Diesel Fuel Maintenance**

Ensures backup power systems are ready when you need them, meeting compliance standards and operational demands.

- **HVAC Replacements & System Upgrades**

We upgrade outdated or inefficient equipment, aligning your systems with energy codes, safety standards, and future-ready building technologies.

- **Support Staffing**

We provide skilled technicians for short- or long-term facility support in HVAC, BMS/BAS, Generator, and Mechanical Systems, ensuring continuity when your in-house teams are short-staffed.

- **Cybersecurity Hardening for Operational Technology Equipment**

We protect your smart infrastructure—from BAS to HVAC controllers—against vulnerabilities that could threaten uptime or data integrity.

RJY Group's approach to O&M combines reliability with innovation. We don't just maintain systems—we help future-proof your infrastructure.
