

Understand anything with NotebookLM

Meet your personal AI-powered research and thinking partner, grounded only in the information you provide.

The screenshot displays the NotebookLM interface. On the left, the 'Sources' panel shows a list of uploaded documents including 'Basics_of_Supply_and_Demand...', 'Economics-101-syllabus.pdf', 'SupplyandDemand.pdf', 'The Classical Theory of Sup...', and 'supply-demand-gaming-th...'. The 'Chat' panel in the center shows a summary of 'Economics 101' with a message: 'These sources collectively explore the fundamental principles of supply and demand through historical, theoretical, and educational lenses. The materials examine how market equilibrium is established when the quantity producers are willing to sell at a certain price aligns with the amount consumers are willing to purchase. Central to this analysis is the concept of elasticity, which measures how sensitively buyers and sellers react to fluctuations in price and income over different time horizons. The texts also contrast the classical view of economics, rooted in observable "reservation prices" and a hierarchy of human needs, with the neoclassical models that utilize abstract utility functions. Additionally, the provided syllabus and lesson plans demonstrate how these economic theories are applied to real-world scenarios, such as government price controls and historical price shifts in commodities like eggs and coffee. Through mathematical formulas and graphical curves, the documents provide a comprehensive framework for understanding how incentives and costs drive the distribution of goods in a market system.' The 'Studio' panel on the right contains tools for 'Audio Ov...', 'Video Ov...', 'Mind Map', 'Reports', 'Flashcards', 'Quiz', 'Infograph...', 'Slide Deck', and 'Data Table'. Below these are three study guides: 'The Dance of Supply an...', 'Study Guide: The...', and 'The Unseen Force...'. A message at the bottom of the interface reads: 'NotebookLM can be inaccurate; please double check its responses.'

Google Workspace for Education users of all ages have access to NotebookLM with enterprise-grade data protection – free of charge

Get AI-driven insights on your own sources

Upload your sources – like strategy plans, education standards, and lecture notes – get answers, and generate summaries, lesson plans, and quizzes. Even expand your research to include your sources in a variety of formats with Deep Research.

Learn on the go with Audio and Video Overviews

Convert documents, slides, and charts into interactive media. Turn your sources into audio discussions led by two AI hosts, where you can ask them to explain a concept differently, or short explainer videos with narration.

Get helpful responses with in-line citations

NotebookLM cites its sources by providing links to the resources you uploaded – all with in-line citations to ensure accuracy.

Visualize information with infographics and slides

Transform your dense source information into engaging infographics or polished PDF slide decks – perfect formats to help you understand complex concepts and share with others.

See connections across sources with Mind Maps

Visually summarize your sources, showing main topics and their related ideas as a branching diagram.

Private and secure

Data you enter into NotebookLM, including your source uploads, queries, and responses, are not human reviewed or used to train AI models.

Explore ways education communities are using NotebookLM

Education leader

- ✓ Reinvent onboarding by uploading standards, codes of conduct, and more to a notebook where new faculty and staff can ask questions and get immediate answers with in-line citations for your sources
- ✓ Provide students with new ways of learning using Audio Overviews and Video Overviews to interact with learning material

Educator

- ✓ Help prepare students for an exam by asking NotebookLM to create a study guide based on the material you upload
- ✓ Share your notebook with students and view how they're engaging with it

Student

- ✓ Study on the go by creating an Audio Overview or Video Overview of your lecture notes in one click
- ✓ Prepare for an exam by asking for sample discussion questions or a practice quiz based on your uploaded class lecture recording

Researcher

- ✓ Organize and interact with robust data and resources in new ways. Upload your research and NotebookLM can quickly summarize videos, slides, charts, PDFs and more – and share insights grounded in your sources.

Get the most out of NotebookLM with additional capabilities

Upgrading to Google AI Pro for Education provides expanded access to premium models and features in NotebookLM.

	Education Fundamentals (Free of charge)	Google AI Pro for Education (Paid)
Chat with AI grounded only in your sources, with citations	Up to 100 notebooks, each with up to 50 sources and 50 chat queries/day	Up to 500 notebooks, each with up to 300 sources and 500 chat queries/day
Create more engaging content with more Audio* and Video Overviews	3 Audio Overviews/day 3 Video Overviews/day	20 Audio Overviews/day 20 Video Overviews/day
Transform sources into clear infographics,* PDF slide decks,* and reports	3 infographics/day 3 PDF slide decks/day 10 reports/day	15 infographics/day 15 PDF slide decks/day 100 reports/day
Create practice quizzes and flashcards for studying using your sources	10 flashcards/day 10 quizzes/day	100 flashcards/day 100 quizzes/day
