MEDICAL EQUIPMENT

BRONCHOSCOPE

BRONCHOSCOPE

FLEXIBLE, PORTABLE & DETACHABLE

The BR series consists of 9 models, fully catering to the needs of the public for intubation and respiratory system diagnosis and treatment. The single-use packaging not only reduces the risk of cross-infection for patients but also helps hospitals achieve cost reduction and efficiency improvement.

Slimmer than Slim, The World's First Clinically Approved 6.3Fr

The HU series has undergone three generations of design, overcoming numerous technical challenges. While maintaining an working channel diameter of 3.6Fr, the Insertion tube diameter has progressively been reduced from 9.0Fr to 7.5Fr, and ultimately to the milestone 6.3Fr, successfully passing clinical surgery trials. This continually shrinking sheath size addresses many challenges in RIRS surgery and provides patients with a more comfortable diagnostic and treatment experience.

Reduced Costs Compared to Traditional RIRS Surgery

Compared to traditional RIRS surgery, using the HU30 series single-use products not only reduces surgical and hospitalization costs for patients, but also lowers operational expenses for hospitals due to the relatively low unit cost, as well as the elimination of the need for disinfection and maintenance. This makes the HU series a viable option for the value-segment market.

Effortless Operation

Weighing less than 300g, the HU series effectively alleviates surgeon fatigue during long procedures. Its standard features, including an Adjustable Angle Knob, 280° bending range, 1080P optimization algorithm, and passive bending function, support doctors in easily tackling even the most challenging surgeries.

ENDOVIEW FLEXIBLE BRONCHOSCOPE HugeMed Series VL3S

o **Pebax Insertion Tube**

Medical-grade material Pebax wraps insertion tube with both stiffness and flexibility

o **Ergonomic Handle**

The handle is ergonomically designed, the overall weight is less than 300g, make it more comfortable for medical staff to use

o **Working Channel Port**

Suction and biopsies can be performed through the working channel

o **Multifunction Buttons**

Dual multifunction buttons for quick white balance adjustment and screenshots

o **Suction Button**

Press the button to start suctioning

o **Distal Tip**

Contains the camera, LED

o **Suction Port**

The suction tube can be connected from here

o **210° Bending Angle**

The 210° up-and-down bending angle makes it easier to find targets

o **Bending Control**

Smooth bending control makes it easier for medical staff to control the distal tip

Model	O.D.	I.D.	Working Length
BR-M22	2.2mm	0mm	600mm
BR-M25	2.5mm	1.2mm	600mm
BR-M32	3.1mm	1.2mm	600mm
BR-M40	4.0mm	2.0mm	600mm
BR-M50	5.0mm	2.8mm	600mm
BR-M58	5.8mm	3.4mm	600mm
BR-M40H	4.0mm	1.2mm	600mm
BR-M52H	5.0mm	2.2mm	600mm
BR-M58H	6.0mm	2.8mm	600mm
